

Yash Bhosale

AI/ML Engineer — Computer Vision — NLP

Mumbai, India | 9607020703 | yashnbhosale7@gmail.com | LinkedIn  | Github 

EDUCATION

Excelsior Education Societys K C College of Engineering

Bachelor of Engineering in Information Technology

Thane, Maharashtra

Nov. 2022 – May 2026

EXPERIENCE

AI/ML Intern

Quantique Metadata Pvt. Ltd

Aug 2025 – Oct 2025

Mumbai, India

- Engineered machine learning pipelines for fraud detection and anomaly analysis on 100K+ structured insurance claim records using Python, Scikit-learn, PyTorch, and TensorFlow.
- Optimized preprocessing, feature engineering, and model training workflows to analyze 100K+ insurance claim records and identify suspicious behavioral patterns.
- Built NLP-based document similarity and intent matching workflows using FuzzyWuzzy and text similarity techniques for automated text comparison and retrieval tasks.

PROJECTS

ProofPixel – Deepfake Detection System

Python, PyTorch, ResNet50, OpenCV, Gradio, Albumentations, Scikit-learn

GitHub

- Architected an end-to-end image and video deepfake detection system using PyTorch, ResNet50, OpenCV, and Gradio for Real/Fake prediction.
- Trained and optimized CNN-based classifiers on 140K+ real and fake facial images using preprocessing, augmentation, and confidence-based inference pipelines.
- Integrated video analysis using CNN + LSTM architecture with face detection, sampled-frame processing, and temporal prediction aggregation across 20+ extracted frames per video.

NLP-Based Car Assistant Chatbot

Python, RAG, Sentence-Transformers, Streamlit, NLP

GitHub

- Designed an NLP-based automotive chatbot using RAG, sentence-transformers, embeddings, and semantic similarity search for contextual query responses.
- Created a Streamlit interface supporting document ingestion, vector retrieval, and real-time conversational interaction.

Movie Recommendation System

Python, Pandas, NumPy, Scikit-learn, Cosine Similarity

GitHub

- Developed a movie recommendation system using collaborative filtering, cosine similarity, and machine learning-based recommendation techniques.
- Analyzed and transformed movie-rating datasets using Pandas, NumPy, and Scikit-learn for personalized recommendations.
- Enforced similarity scoring and ranking algorithms to generate user-specific movie suggestions based on viewing preferences.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

ML / AI: PyTorch, TensorFlow, Scikit-learn, OpenCV, NLP, RAG, Computer Vision, CNN, LSTM

Frameworks & Libraries: Pandas, NumPy, Matplotlib, Albumentations, Flask, Streamlit

Tools & Databases: Git, GitHub, VS Code, Postman, MongoDB, MySQL

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate

DeepLearning.AI — Neural Networks and Deep Learning

Hugging Face — NLP Course
